

SIOP PODC Supportive Care Education

Presentation Date: 31st August 2016

(Part 2)

**"Coping with the psychosocial
issues in resource limited setting"**

Rehana Punjwani

Indus Children Cancer Hospital

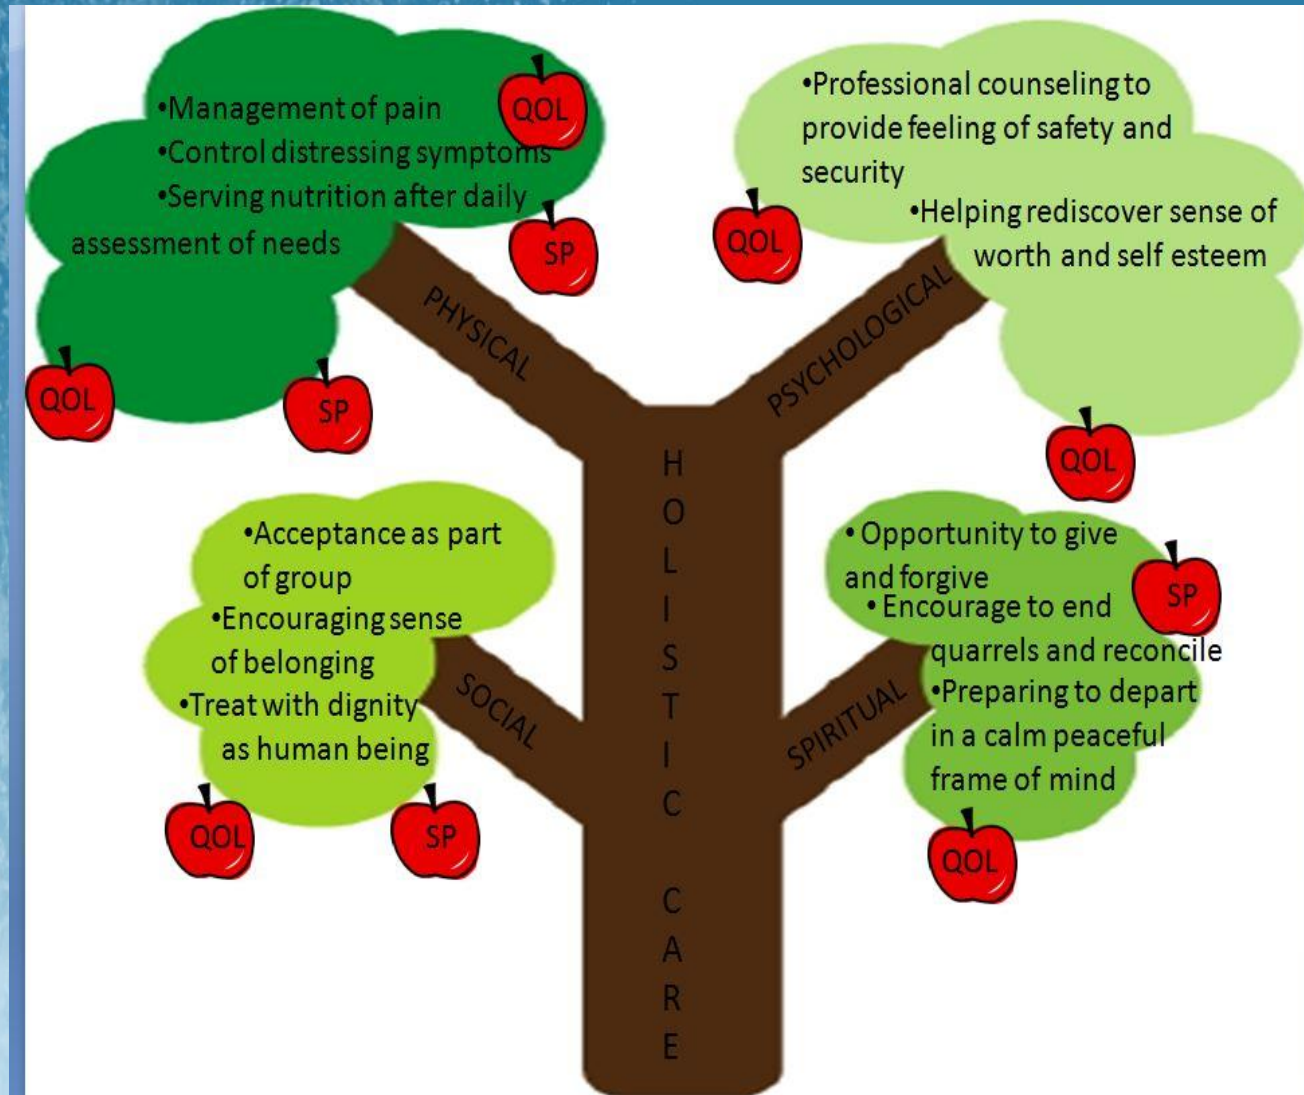

Karachi, Pakistan

Accessibility to Psychosocial care In LMIC

- Considered luxury
- Limited financial recourses to support entire department
- Lack of expertise
- Social acceptance
- Insufficient significance

Nursing is Holistic care

- Physical
- Psychological
- Social
- Spiritual

Nursing scope in LMIC

- Very basic
I/O monitoring , vital signs charting, bathing assisting in ADL's, medication administration etc.

Challenges

- Nurse patient ratio
- Knowledge/skill
- Autonomy
- Limited resources
- Rotational duties
- Compassion fatigue
- Stigmatization

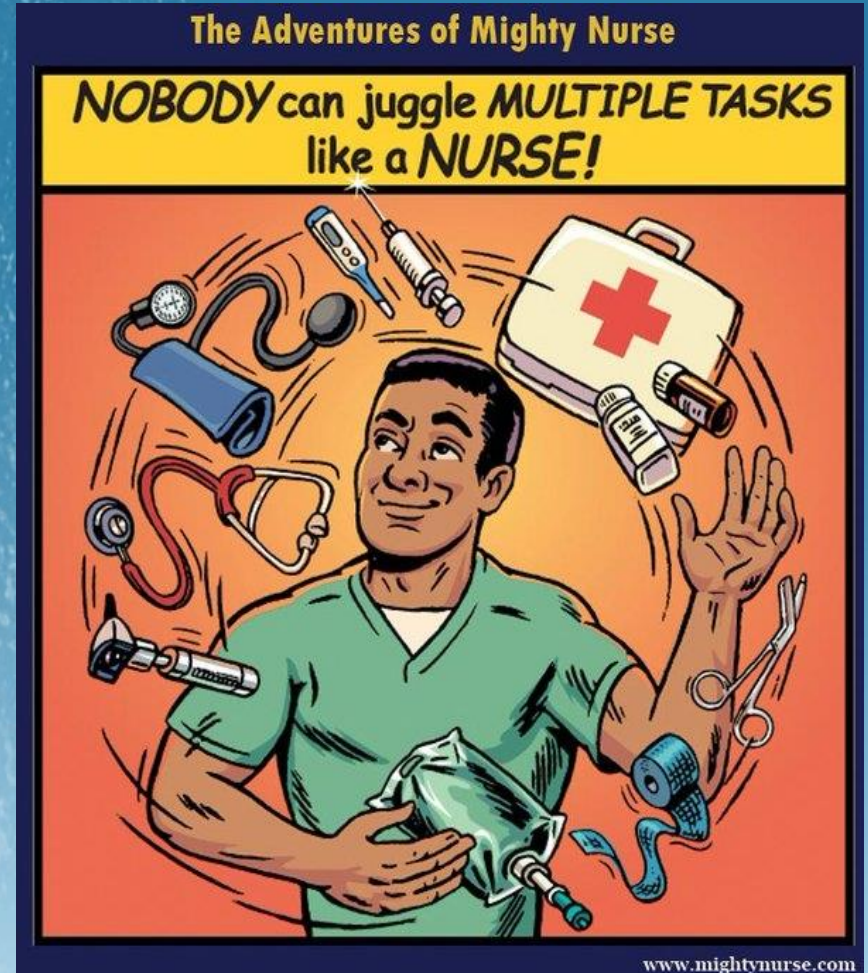

Nurses role in psychosocial care

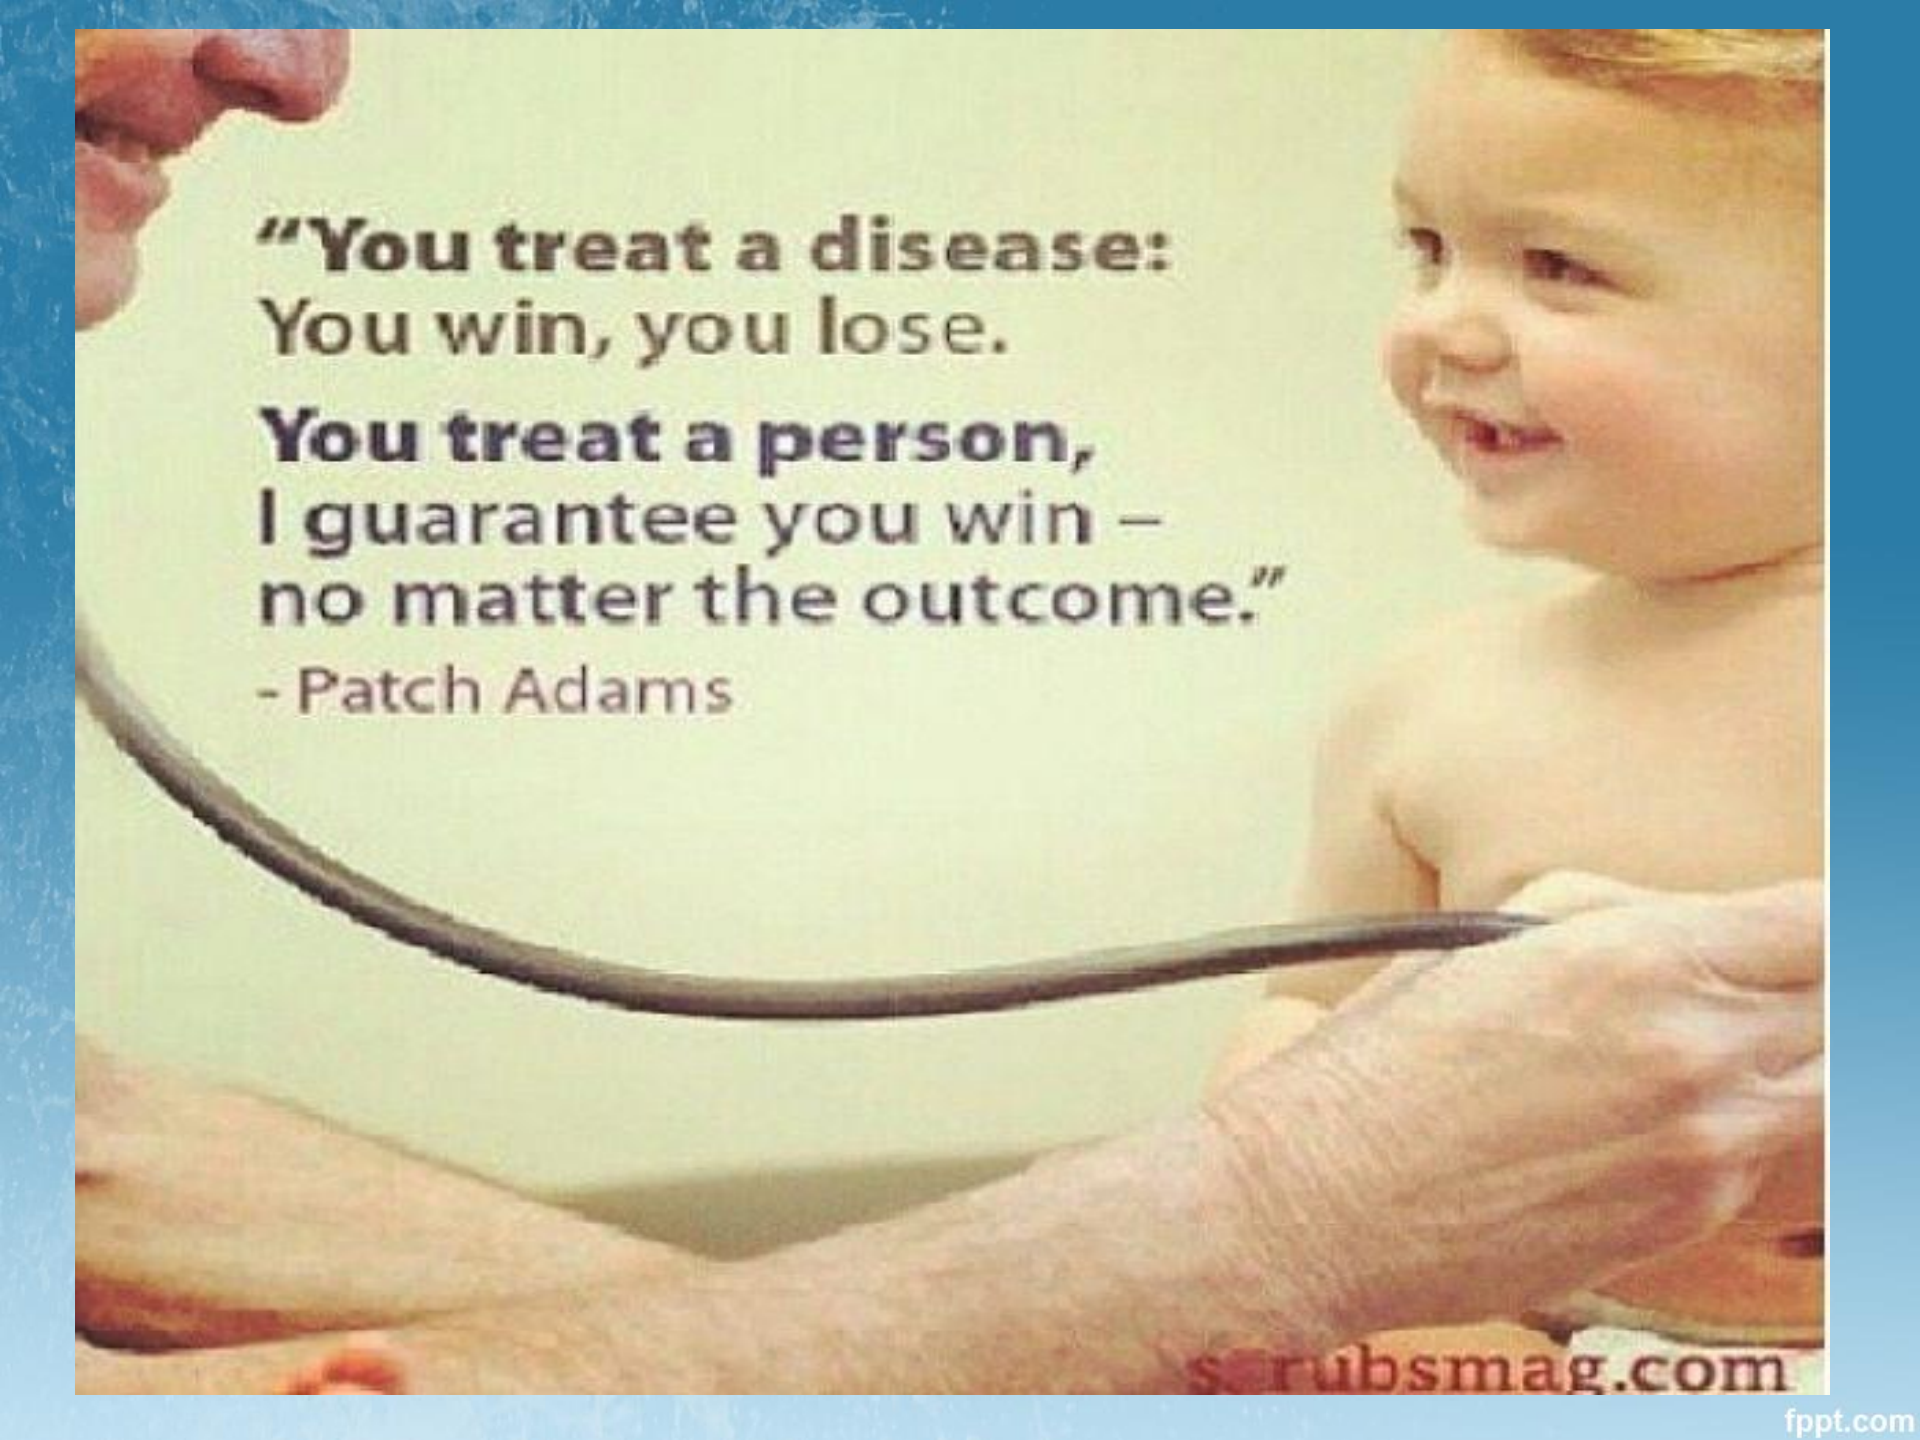

- Spend most time with patients
- Detect the changes in mood, thinking, or feeling
- Advocates
- Timely and effective assessment
- Collaborator

Simple Approach

- Identifying patients by name
- Strong eye contact
- Sincere concern
- Smiling and laughing when appropriate
- Therapeutic touch
- Respect & dignity
- Being approachable
- Offer help
- Good listener
- Be open-minded for certain religious, cultural, or spiritual beliefs

**"You treat a disease:
You win, you lose.**

**You treat a person,
I guarantee you win –
no matter the outcome."**

- Patch Adams
